

What are the network cable numbers in the network cabinet

Overview

And the numbers mean the panel 14-port 01 & 20-port 03. This ID is suitable for the label size and easy for reading when looking. “AB05” means the cabinet. With the right labeling system, you can trace any connection in seconds instead of hours, keep your documentation airtight, and make your infrastructure truly scalable. What is the ANSI/TIA-606-B Cable Labeling Standard?

The American National Standards Institute and Telecommunications Industry. A plan of the cable runs, lengths and terminations is created before laying any cable. It also includes other pertinent details such as the type of termination or cable specifications. Four pairs of twisted wires — blue, orange, green, brown — are placed on pins 1—8.
